

BCN EPITHEL

post-peel treatment

BCN Epithel soothes the skin and restores the hydrolipidic mantle of the areas treated with chemical peelings, laser or other abrasive cosmetic procedures. Its formula has soothing, anti-inflammatory, moisturizing, anti-oxidant and healing properties that boost the natural reepithelialization process of the skin. Contains organic silica, allantoin, biotin, urea, methionine and vitamins A (retinol), C and E. BCN Epithel provides the following specific benefits:

- Calms the skin and has anti-inflammatory properties.
- Promotes healthy tissue formation.
- Enables the skin to absorb more moisture.
- Strengthens the skin's barrier function protecting its lipid balance.
- Reduces transepidermal water loss.
- Stimulates collagen synthesis.
- Has antioxidant properties and fights free radicals.

For optimal results, BCN Epithel is the indispensable cosmetic complement to your professional medical-aesthetic treatment.
