

MESOBLANCHE

melano treatment

MesoBlanche® depigmentation cream combines powerful active agents that act upon the skin's natural pigmentation cycle, resulting in an even complexion and a healthy, luminous skin.

MesoBlanche® delivers the following specific benefits:

- ✓ Exfoliates non-aggressively, eliminating dead cells and accumulated pigment.
- ✓ Actively prepares the skin, to boost penetration of the most powerful lightening agents.
- ✓ Interferes in melanin synthesis, to dramatically diminish and prevent the appearance of pigmentation.
- ✓ Increases cell production by activating cellular respiration and oxygenation.
- ✓ Built-in sun protection against the action of UV rays.
- ✓ Plant extracts calm the skin and reduce irritation.

For optimal results, MesoBlanche® is the indispensable cosmetic complement to your professional mesotherapy depigmentation treatment.
